

## ***Spatially Aware Document Management Solution***

Cloud based document access from anywhere using Think GIS®

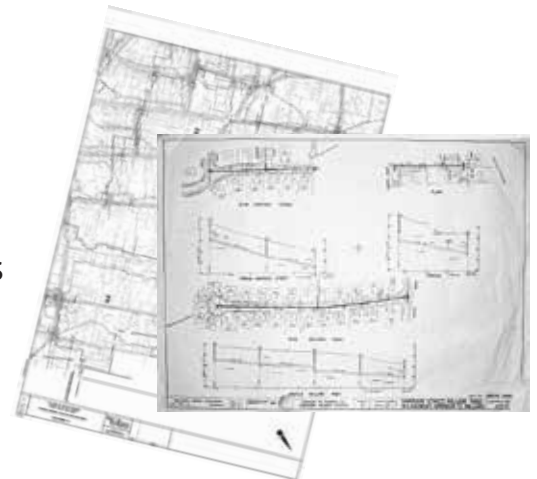

### ***Secure Cloud Storage for Digital Files***

Is your document storage situation similar to this? Is yours even worse? Convert your bins, boxes, racks and cabinets into an easily accessible, secure, cloud based storage system with Think Library®. Imagine being able to find just the document you need in a matter of seconds, and, being able to view it, print it and email it with just a few clicks from anywhere you have an internet connection. That's what Think Library® can do for you!

### ***Store and Easily Organize Any File Type***

Plans, As-builts, Elevation Profiles, Specification Sheets, Photos, Videos and more can all be loaded into Think Library®. There they are securely stored and continuously available. The Think Library® management console allows for the addition of key words and search terms for each uploaded document. This allows users to quickly locate any file related to a project or activity simply by searching the related keywords.

### ***Spatially Reference Files in Think GIS® Maps***

Think Library® allows any file to be referenced to a location in Think GIS®. It's not necessary to link a document to a specific feature, although, that option is available. Think Library® allows a document to be referenced to a custom defined polygon which precisely defines the area represented in the file. This allows a user to easily find any document that may have information related to a location or nearby locations with just a click on the map!
